

### **Glimakra Counter-march Loom for sale**

Made in Sweden of Swedish pine, the full-sized Glimakra Standard loom is extremely versatile and can be adapted and expanded as your interests in weaving grow and change. Like other counter-march looms, it allows a large shed even on a high-tensioned warp. The warp and cloth beams both have heavy metal ratchet brakes for weaving with high tension. Because the harnesses have open ends, heddles can be added at any time, even during threading. The overhead beater has a light touch and can be removed completely for threading. The beater has three positions so it can be moved toward the back of the loom as weaving progresses. This allows you to weave as much as possible before getting up to go to the back of the loom to advance the warp. This Standard Glimakra is 63".

Glimakra Standard loom comes with:

- bench
- 1000 Texsolv heddles
- tie-up kit using Texsolv cord and plastic pegs
- lease sticks
- warp sticks
- non-skid rubber feet
- assembly instructions and the book *Tying up the Counter-march Loom*

New loom costs \$5,800.00

***One owner***
